

inpeek
empowering and connecting people

Summarix

the smart inpeek solution
for sales and business-relevant
project and employee data

We know your challenges ...

Time-consuming search and derivation weakens competitiveness

High costs due to inefficient and manual processes

(Billable employees need a lot of time for data maintenance and preparation)

Inconsistent and decentralized data storage

leads to redundant work

Limited flexibility and design options

make it difficult to optimize profiles and project references

Lack of information and data on projects and employees

due to incomplete documentation

Summarix improves ...

The availability of your employees

The time-consuming documentation process is significantly shortened

Access to relevant information – quickly and intuitively

Skills, best practices, assignments and projects

Stakeholder and customer data preparation – selective, targeted and precise

The availability of sales-relevant data and documentation – efficient and standardized

Say goodbye to scattered and inconsistent information!

Your own professional appearance

With modern forms individually designed according to your CD

Highlights & functions

- ✓ AI-supported chatbot for intelligent search
- ✓ Built-in PDF generation of profiles & projects
- ✓ Standardized layout for all documents
- ✓ Maximum scalability through versioning function
- ✓ Analytics apps for systematic data analysis
- ✓ Cost efficiency & scalability through SaaS model
- ✓ Fast use through simple & intuitive SAP Fiori on SAP BTP
- ✓ Deployment and use of the latest cloud technologies
- ✓ SaaS API and application components ensure seamless integration and extensibility of the solution

Generation of PDFs for profiles and projects

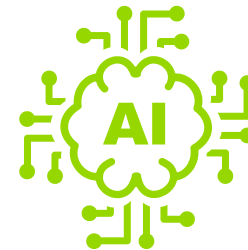

Integrated chatbot & GenAI

Efficient and precise queries thanks to SAP HANA Knowledge Graph from the entire database about employees, skills, assignments & projects using the integrated **LLM chatbot**.

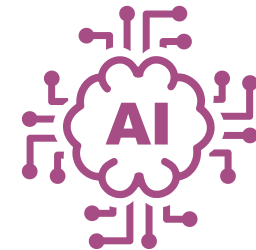

Example of possible business-relevant queries:

Which employees have over 5 years experience in the SAP FI & EAM modules?

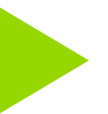

How many projects do we have in the federal environment?

Summarize our project history of the customer xxx in chronological order

RESULTS

Integrated chatbot & GenAI

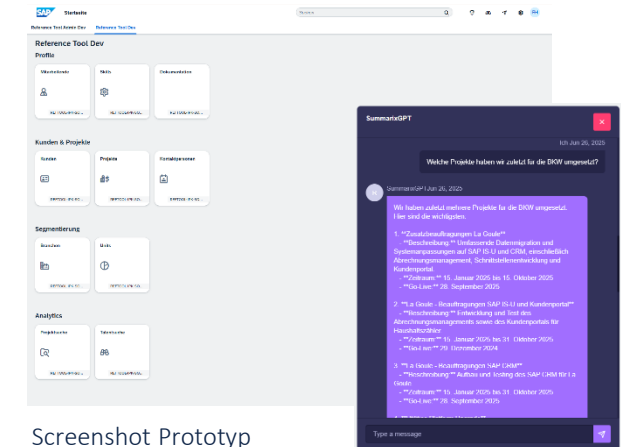

Generated texts based on specific requirements within employees and projects:

AI-Zusammenfassung

Spezifische Anweisungen (Prompt):

Fasse mir die Expertise von Siro Müller im SAP MM Bereich zusammen

AI-ZusammenfassungAbbrechen

Screenshot Prototyp

Siro Müller has extensive expertise in the SAP MM (Material Management) area, which spans numerous projects. He has played a key role in the implementation and further development of solutions in SAP S/4HANA, particularly in the MM and SD modules.

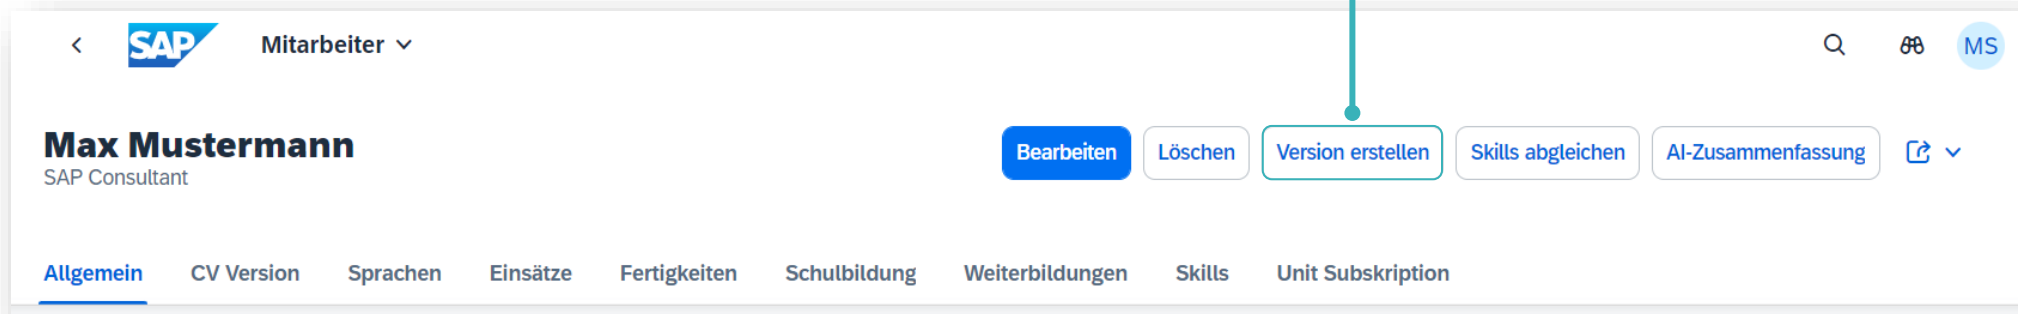

His most recent projects include support in the further development and operation of S/4HANA in the MM, SD, FI, CO, PS, IS-U and PM modules, where he designed solutions and recorded requirements. He was also involved in project management for mobile warehouse management, where he recorded the requirements for mobile apps in SAP MM and LE and designed the apps.

Create versions of your master data

With just a few clicks, you can create flexible **versions** of your project and employee data - without affecting the master data.

Ideal for individual requirements, time-critical requests and tenders.

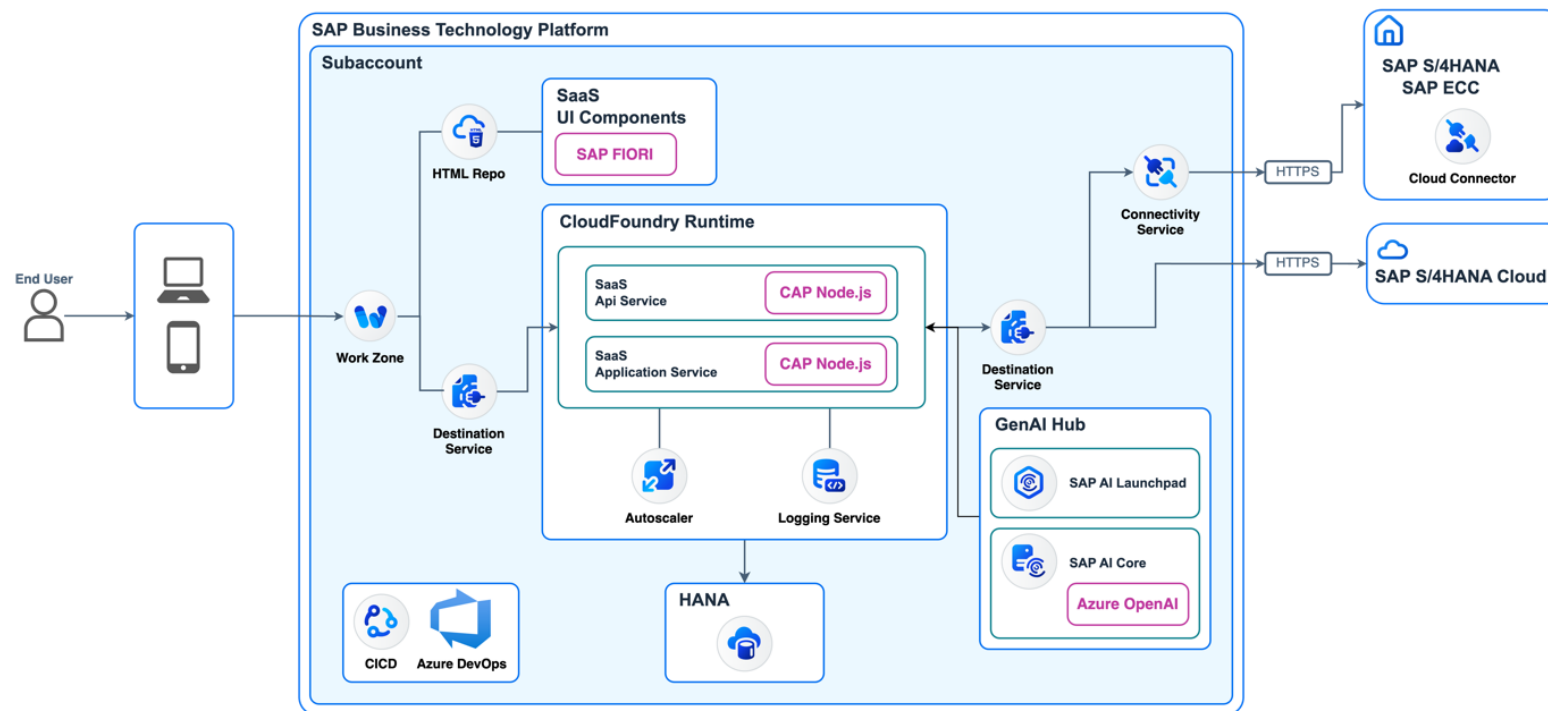

System architecture overview

Summarix is an SAP Fiori app, implemented in the SAP Business Technology Platform (BTP) with an SAP HANA Cloud database.

The Cloud Foundry Runtime provides a scalable and reliable environment with Autoscaler, Logging Service and CAP Node.js.

The powerful combination of SAP AI Core and AI Launchpad ensures intelligent analyses and automation.

SaaS API and application components enable seamless integration and expandability.
